

hello. we live near the rail line at nairne..... over the past
2 years the amount of extremely heavy freight has increased
a great deal.....

we have no complaint re the light rail that passes by - in
fact i quite like it - but the heavy freight causes our house
to rattle/small drawers move/wall hangings move/ etc.
etc.....

i believe that heavy freight should be moved to a more direct, flat line - surely the wear on the
locomotives would

be less, time would be saved - etc. etc.
