## Gateway Motorway - Bracken Ridge to Pine River

State/Territory: Queensland

Proposed AG funding: \$800.0 million

Mode	Major freight route	Major Commuter corridor	Commercial precinct
	✓	✓	✗

### PROBLEM DESCRIPTION

The Gateway Motorway at Bracken Ridge where it merges with Gympie Arterial and crosses Pine River is highly congested and is facing demands from south-east Queensland population growth and continued expansion of the Australia TradeCoast. Upgrades to this section of the motorway will complement the recently completed works on the motorway between Nudgee and Deagon that were completed in March 2019.

The upgrade of this section of the motorway will alleviate traffic congestion and will help to improve travel times, improve freight efficiency and safety, whilst also improving connectivity between central and north Brisbane.

This project is expected to support more than 1,000 jobs over the life of the project and is expected to be funded on an 80:20 basis with the Queensland Government.

### PROJECT BENEFITS

- **Improve travel times.**
- **Increase connectivity.**
- **Improve transport efficiency and safety.**
