**BUILDING OUR FUTURE**

# Infrastructure Pipeline

## Sealing Roads in the Dandenong Ranges and Surrounds

**State/Territory:** Victoria

**Proposed AG funding:** \$300.0 million

### PROBLEM DESCRIPTION

The Dandenong Ranges region (the Dandenongs) is a major tourist destination that welcomes visitors from around the world to this unique part of Australia each year, but is also one of the most bushfire-prone areas in Victoria.

There are a range of roads that require upgrading and sealing across the Dandenongs to support economic development and tourism, as well as changes associated with population growth.

Better local roads in the Dandenongs will not only support the local tourism industry but will also provide improved access and safety for the local community, including through peak bushfire season.

### PROJECT BENEFITS

- **Improve accessibility, connectivity and travel times.**
- **Support future traffic demand.**
- **Improve road safety.**
