Infrastructure Investment Program

Princes Highway Corridor (NSW) – Jervis Bay Road to Sussex Inlet Road – Stage 1

New South Wales

BUILDING OUR FUTURE

Australian Government funding: \$400.0 million

New South Wales Government contribution: \$100.0 million

Total: \$500.0 million

Project description

This project involves upgrades along the Princes Highway Corridor between Jervis Bay Road and Hawken Road. It forms part of broader upgrades to the Corridor in New South Wales, including the 20 km section of the highway between Jervis Bay Road and Sussex Inlet Road. This section is predominantly a two-lane, undivided road, with limited overtaking opportunities and heavy traffic volumes during peak tourist periods. It also has a poor safety history – with 126 crashes, including five fatal and 42 serious injury crashes, on this section between 2014 and 2018.

These upgrades will provide a safer corridor for all transport users, and support increased capacity and traffic efficiency.

Jobs supported

- This project is expected to support 980 direct and indirect jobs

Project benefits

- Improved road safety for all road users
- Reduced congestion and improved travel times
- Improved efficiency and network reliability
- Improved accessibility and connectivity of road networks

Project timelines

- This project is expected to start construction in late 2022 and be finished construction by late 2026
