BUILDING OUR FUTURE

Infrastructure Investment Program

Monash Roads Upgrade

Victoria

Australian Government Funding: \$250.0 million

Total: \$250.0 million

Project description

This project is expected to upgrade the two intersections at Clyde Road and Kangan Drive and Clyde Road and Monash Freeway. The upgrade is expected to include widening of the Monash Freeway bridge, three through lanes in each direction, additional turning lanes and a shared path in each direction over the bridge. The project is also expected to include freeway terminal upgrades, improved right turn storage on the bridge structure and a provision for a future signalised intersection.

The Clyde Road intersections provide primary access into the Berwick Health and Education Precinct and experience a considerable level of competing demand from various movements.

The project is expected to provide access and connections for the community, including improved access to local employment and services, as well as reduced congestion and delays.

Jobs supported

- This project is expected to support 610 direct and indirect jobs based on Australian Government estimates

Project benefits

- Reduced congestion and improved travel times
- Improved connectivity between people with jobs and services, and goods with markets
- Improved efficiency and network reliability

Project timelines

- This project is expected to start construction in mid 2022 and be finished construction by mid 2023
