# Investment Infrastructure Program

Ipswich to Springfield Options Analysis

Queensland

### Australian Government Funding: \$1.0 million

Queensland Government Contribution: \$1.0 million  
Local Government Contribution: \$500,000  
**Total: \$2.5 million**

### Project description

Under the **South East Queensland City Deal**, the Australian Government, Queensland Government, and Ipswich City Council will commit to deliver an Options Analysis for a public transport corridor between Ipswich Central and Springfield Central including nine new stations. The Options Analysis will consider options to minimise congestion on the constrained road network and maximise potential connections to nationally significant growth and freight corridors. It will also establish options to create a regional link to Brisbane, offering residents better access jobs and services. Following the Options Analysis, Deal Partners will consider a jointly funded detailed business case subject to the outcome of the Options Analysis and further approvals. If approved, the total investment for the project is \$10 million (\$2.5 million committed towards an Options Analysis; with a further \$7.5 million for a detailed business case, including an additional \$3.375 million from the Australian and Queensland Governments and a further \$0.75 million from the Ipswich City Council).

### Jobs supported

- Job figures are not provided for planning or business case projects.

### Project benefits

- Improved passenger rail services.
- Supporting a more integrated and effective transport system.

### Project timelines

- This project is expected to commence in 2022.
