BUILDING OUR FUTURE

Infrastructure Investment Program

Targeted Investments to Improve National Supply Chain Resilience

South Australia

Australian Government Funding: \$60.0 million

South Australian Government Contribution: \$15.0 million

Total: \$75.0 million

Project description

This project will deliver a targeted package of work that will improve sections along each of the Stuart and Eyre Highways that are subject to flooding to improve the resilience of the network.

Work will include upgrades to sections of the Highways to improve drainage and ensure that these national freight routes which are key to interstate supply chains to the North and West of Australia remain open. Works will include improvements at Glendambo, Lake Windabout and Woocalla Creek along the Stuart Highway and a section 20km west of Kimba along the Eyre Highway.

Jobs supported

- This project is expected to support 165 direct and indirect jobs.

Project benefits

- Improved efficiency and network reliability.
- Improved accessibility and connectivity of road networks.

Project timelines

- This project is expected to commence construction in late 2022 and be completed by late 2024.
