# Infrastructure Investment Program

## Leach Highway / Stock Road Grade Separation (Planning and Project Development)

Western Australia

### Australian Government Funding: \$5.0 million

Western Australian Government Contribution: \$5.0 million

**Total: \$10.0 million**

### Project description

This project will undertake planning and project development of a grade separation of the Leach Highway and Stock Road intersection.

Leach Highway is an important east-west arterial highway for freight and commuter vehicles, connecting Perth Airport and surrounding industrial areas with the City of Fremantle and Western Australia's major container port at Fremantle. Grade separating the intersection is anticipated to reduce congestion, improve safety and improve freight efficiency.

The planning and project development phase for the future grade separation will ensure that stakeholder concerns, social impacts and project delivery risks are better understood and will determine appropriate mitigation measures.

### Jobs supported

- Job figures are not provided for planning or business case projects.

### Project benefits

- Planning and design of future public investments.

### Project timelines

- This planning project is expected to commence in mid-2022 and be completed by mid-2024.
