BUILDING OUR FUTURE

Cunningham Highway – Yamanto to Ebenezer (Amberley Interchange)

Cunningham Highway – Yamanto to Ebenezer (Amberley Interchange)

Project Cost: \$340 million

Estimated AG funding: \$170 million

PROJECT DESCRIPTION

The project involves the upgrade of the Yamanto and Amberley intersections with the Cunningham Highway, and construction of a new two-lane deviation off the highway connecting with the northern end of Amberley Road. In addition, a range of safety works will be undertaken along the route that could include safety barriers, channelised right turn intersection upgrades, wide centreline treatment to separate opposing traffic, and overtaking lanes.

Related/complementary projects

There are currently pavement rehabilitation works underway on the Cunningham Highway between Mutdapilly and Warrill View as part of the National Highway Upgrade Program.

PROBLEM

The Cunningham Highway has the third highest crash risk out of major Queensland routes. Between 2006 and 2014, there have been 17 fatal and 87 serious-injury crashes on this stretch of the Cunningham Highway. The Cunningham Highway forms part of the National Land Transport Network, and is an important freight link.

BENEFITS

Improved Connectivity and Capacity

- Improved transport linkages and road capacity to facilitate major economic and defence-related developments.
- Improved transport connectivity between residential and industrial developments.
- Improved capacity on the Cunningham Highway to meet the needs of regional freight and commercial traffic movements.

Improved Safety Outcomes

- Provide a roadway and intersection that comply with contemporary safety and design standards and meet community expectations and the needs of all road users.
