Australian Government Funding: $0.25 million
Australian Government: $0.25 million
Northern Territory: $0.25 million

Problem Description
This project will upgrade a high priority section of the Stuart Highway by strengthening and widening the road at its intersection with Howard Springs Road. The upgrade will improve the quality of the road, provide better overtaking opportunities, allow for growth in traffic volumes, as well as improving road safety. The project will contribute to the overall improvement of the standard of the highway. This will support industry and business by providing improved freight links and social equity by providing a more efficient and reliable means for Territorians to access key essential services such as education, health and time-critical emergency services.

Project Benefits
Benefits include:
- Improved efficiency and network reliability.
- Improved connectivity between people with jobs and services, and goods with markets.
- Improved accessibility and connectivity of road networks.
- Improved road safety for all road users.

Project Timelines
Construction will begin in September 2020 and is scheduled to be completed in December 2020.
