Infrastructure Investment Program

BUILDING OUR FUTURE

Cloncurry – Dajarra Road
Queensland

Australian Government Funding: \$16 million

Australian Government: \$16 million
Queensland Government: \$4 million

Problem Description

Cloncurry - Dajarra Road functions as a key intra-regional route connecting the townships of Cloncurry and Dajarra. Cloncurry - Dajarra Road is a vital transport link for the movement of cattle, mining supplies and products, fuel, food and freight.

The extent, poor pavement condition, and the limited number of overtaking opportunities are reducing the efficiency and safety of the road link. This problem is exacerbated by an increasing traffic volume and a growing number of heavy vehicles which often travel at slower speeds than general traffic. This project will complete the seal between the start of Cloncurry-Dajarra Road and the turnoff to Phosphate Hill. It will also widen priority sections of narrow sealed road. The upgrades to the Cloncurry-Dajarra Road will support economic growth by providing a more reliable and efficient route. Social benefits will also be realised as remote towns will have improved accessibility to employment opportunities and vital services.

Project Benefits

Benefits include:

- Improve road safety for all road users.
- Improve efficiency and network reliability.
- Improve connectivity between people with jobs and services, and goods with markets.
- Improve accessibility and connectivity of road networks.
- Improve freight productivity

Project Timelines

Construction on this project is expected to commence in August 2020 and be completed by March 2022.
