Australian Government Funding: $4 million
Australian Government: $4 million
Western Australian Government: $4 million

Problem description
The section of Thomas Road, between Kwinana Freeway and Nicholson Road, is a single carriageway that transports around 19,000 vehicles per day, including a high volume of freight traffic. Nearby commercial and residential developments are forecast to increase demand on the road, which will create congestion and safety issues if the road is not upgraded.

The project will upgrade Thomas Road between the Kwinana Freeway and Nicholson Road, including 1 kilometre of Dual Carriageway.

Project Benefits
Benefits include:
• Improve road safety for all road users.
• Reduce congestion and improve travel times.
• Improve efficiency and network reliability.
• Improve accessibility and connectivity of road networks.

Project timelines
• This project is expected to commence construction in late-2020 and be completed by late-2021.
