Maldon to Dombarton Rail Link Feasibility Study
Nation Building Infrastructure Investment Division
Department of Infrastructure and Transport
GPO Box 594
CANBERRA ACT 2601

Dear Sir

Maldon to Dombarton Rail Link Feasibility Study
[In response, please quote File Ref: TT/03/979807]

In response to the Department of Infrastructure & Transport's call for comments on the Maldon to Dombarton Rail Link Feasibility Study Discussion Paper, we wish to advise that Sutherland Shire Council supports the development of the Maldon Dombarton Railway.

Sutherland Shire residents, businesses and visitors to the local area are currently exposed to significant noise and air pollution from coal and other freight trains travelling through our suburbs. Our commuter rail infrastructure capacity is also compromised by the freight train traffic.

We would appreciate Council being kept informed regarding this project and being provided with any material that the Department can make available at this time and as the Study progresses.

Yours faithfully

Ian Drinnan
