## **HEAVY VEHICLE REST AREA SURVEY**

Under the Heavy Vehicle Rest Area initiative, the Australian Government is supporting our truck drivers who keep Australia moving, through building new and upgrading existing heavy vehicle rest areas nationwide.

This \$140 million commitment over ten year assists in ensuring that truck drivers have access to facilities they need, and will also support jobs and opportunities for local suppliers and businesses.

A Steering Committee chaired by Senator Glenn Sterle has been established for the initiative to ensure the road transport industry and truck drivers have a voice in the design of the initiative and provide advice on assessment of submissions.

To support the initiative, a survey has also been created which seeks feedback from the Australian community on any roads that require a new rest area, or existing rest areas that need improvements.

The survey can be accessed by scanning the QR code below using your phone camera.
