Melton Line Electrification – Development

Infrastructure Investment Program

Connecting Australians | Enriching Communities | Empowering Regions
Supporting Priority Land Transport Infrastructure Projects

Project Scope

This project will undertake development works to support the future electrification of the Melton Line.

Key elements include site investigations, design development, equipment purchases that require a long lead time, and planning activities to inform future delivery.

Funding

Total Commitment: \$152.7 million

Australian Government Commitment: \$76.4 million

Victorian Government Commitment: \$76.4 million

Benefits

These development works will inform future Australian Government investment decisions in the delivery phase. Anticipated benefits of a future construction project will likely include:

- Increased capacity
- Improved network reliability
- Improved network efficiency
- Improved productivity
- Improved accessibility
- Supporting regional connectivity

Delivery Timeframes

Development works are anticipated to commence in 2026 and be completed in 2028.
