

Victoria

Western Freeway Upgrade (Melton to Caroline Springs) - Preconstruction

Infrastructure Investment Program

Connecting Australians | Enriching Communities | Empowering Regions
Supporting Priority Land Transport Infrastructure Projects

Project Scope

This project will deliver preconstruction activities for future upgrades to the Western Freeway between Melton and Caroline Springs.

Key elements include detailed investigations, design development, and targeted land, planning and environmental investigations to inform future delivery.

Funding

Total Commitment: \$50 million

Australian Government Commitment: \$50 million

Benefits

This preconstruction work will inform future Australian Government investment decisions in the delivery phase. Anticipated benefits of a future construction project will likely include:

- Increased capacity
- Improved network reability
- Improved network efficiency
- Improved safety
- Improved productivity
- Improved accessibility

Delivery Timeframes

Preconstruction activities are anticipated to commence in late 2026 and be completed by around late 2028.
